

# How To Reduce Your Operating Costs With Green Gorilla

With a **Green Gorilla** collection service all your dry waste goes into one bin, we will collect it and deliver it to our specialised facility where your recyclable materials are separated from landfill waste.

There's no need for multiple waste bins on your site and that means less bin rental charges, fewer waste collection charges and lower operating costs. With less bins onsite you also free up valuable commercial footage.

- Reduce your waste bin rental fees
- Reduce your bin collections charges
- Reduce your operating costs
- Regain valuable commercial land
- Cut down staff time sorting your waste
- Reduce the disruptions to your business
- Fewer collections mean less traffic and emissions

## A REMARKABLE SOLUTION TO IMPROVE YOUR BUSINESS SUSTAINABILITY

There's also great news for businesses that have been unable to sort and separate their waste, just leave it to **Green Gorilla** and our resource recovery facility will do it for you. By using its processing facility **Green Gorilla** can recover much of your general waste that would previously have gone to landfill. That's a great result for businesses and organisations who want to improve their sustainability.

### Auckland's only Commercial and Industrial Waste Processing Facility

It's here that your recyclable materials are separated from landfill waste. Our state-of-the-art waste processing facility uses a series of augers, screens, density separators, eddy currents and optical sorters to separate different types of waste for reuse. It is the most modern waste sorting process of this kind in Australasia and the largest in New Zealand.

Put simply, **Green Gorilla** is the cost-effective, sustainable waste service that's great for your business, our city and country.
